

Do you agree we need to make it safer and easier for children to walk and ride a bicycle to school?

Australian children are less likely to walk or ride a bicycle to school than children from most other OECD countries.

Children walking or cycling to school

Strongly disagree 1 2 3 4 5 Strongly agree

To make streets easier to cross, are you willing to consider the following:

Select all that apply

- More crossing facilities, e.g. raised crossings ("wombat crossings")
- Reducing traffic speeds in built-up areas
- Reducing car traffic volumes
- Other: Working with schools, Transport NSW, NSW Health, NSW DoE

To protect neighbourhoods from "rat running" do you support low car traffic neighbourhoods?

Low traffic neighbourhoods prevent rat running by only allowing local traffic and encouraging walking and cycling. Photo source: Mark Sutton, cycling industry news.

In order to make it safer for children to walk to school, do you support 30 km/h limits in neighbourhoods?

International best practice is 30km/h for local streets. Read more about the benefits of 30km/h streets and myth busting <https://theconversation.com/busted-5-myths-about-30km-h-speed-limits-in-australia-160547>

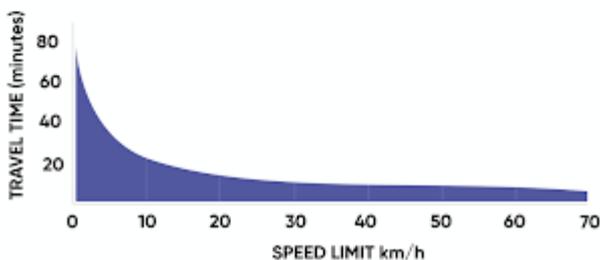

Travel time urban area

	Average Speed	Travel time for 1km	Travel time for 3.5km
	5km/h	12 min	42 min
	15km/h	4 min	14 min
	21km/h	2.9 min	10 min
	26.4km/h	2.3 min	8 min

What are your thoughts about improving walkability in our LGA?

The next step is to complete the Active Transport Strategy. This will build on previous walking and cycling plans. The key push will be 40kph max throughout the LGA, apart from RMS managed roads. However implementation of this will depend on consultation.

Please specify any council motions that you supported or proposed to make walking better in our LGA (please provide a description, date and/or motion number).

Don't recall motions, but there have been several plans and I have been leading the Active Transport Working Group for about 10 years.
